Amy- Hello, welcome back I'm Amy...

Anna- ..and I'm Anna!

Amy- Today we're going to talk about Chinese style makeup.

Anna- Well I've only started learning makeup last year so I'm not too experienced with it, but I know you have a lot of experience in it.

Amy- Yeah, I started learning it after seeing it online on chinese social media apps, and it's actually trending on tik tok too, I remember seeing it and having a feeling that was like... yeah this definitely will suit me, because you know, I have the same features as them and it IS after all an asian makeup look.

Anna- Yeahhh, I remember before when I used to do western makeup and it looked like I got punched in the eye man! (Laughter) That thick eyeliner did not suit me. I think it's definitely important to find a makeup look that enhances your features I think.

Amy- Yeah, you're so right, don't worry I had that phase too.

Anna- Yeah I remember.

(Laughter)

Amy- But let's not talk about that! So, I'm actually curious and have some questions for you.

Anna- Of course, go ahead.

Amy- So, what actually got you into learning Chinese style makeup?

Anna- Well, you know, talking about age, I'm losing all that collagen now! I need to look young and youthful, you know! So I need to try.. I think Chinese style makeup makes me look much more younger.

Amy- So true, that's why there's a trending makeup look that's trying to achieve like a doll-like look. Have you ever tried it? Or heard of it before? Was it hard for you?

Anna- Yeah it's actually quite fascinating because it actually transforms a person quite a lot and I've tried it and it's hard but anyways! I'm getting better at it...and hopefully by practicing more I can get that eyeliner right. Anyways, speaking of which, I should go now. Gotta practice my eyeliner skills!

Amy- Good luck to you! And good luck to everyone that's learning makeup!
